

# PRODUCT OVERVIEW

Help support your local youth organization this school year with the purchase of a locally handcrafted, Rewined candle. The perfect gift for any occasion!

Making candles is a way to tell stories about the things we love through fragrance. Every story is a labor of love, shaped and shared by many hands. To light a candle is to activate the senses — to create the spark that becomes the flickering flame, that warms the wax, and releases the fragrance within. To inhale its scent and know the seasons, the herbs, fruits, flowers, plants, and the people who tend them. To light a candle is to reach across a time and explore

memory, lands near and far. To create the glow that softens the edges, calms, and resets something deep within. To change the mood, throw open the windows, and make room. To bring light into dark spaces, conjure, illuminate, and inspire. To savor the food we eat, the wine we drink, and the time we have together, more. To lean into wonder. To set the table and raise our glasses. If lighting a candle teaches us anything, it's that when we slow down and look around, every moment is chance to come back to our senses, to reveal in them, and find the magic that connects us all.

# REWINED

## SIGNATURE ●
